

EROAD

Drive

Dynamic driver app for a connected ecosystem

Drive is the ultimate in-cab mobile app for drivers, providing access to truck-specific navigation, HOS logging, messaging, jobs, DVIR, forms, real-time feedback and custom applications. Designed to reduce paperwork, save time and streamline your drivers' day, DRIVE displays all your apps on one screen in an easy-to-use format.

Simplify compliance

Reduce time-consuming paperwork and manual record keeping.

Boost safety and your bottom line

Configurable interface, truck-specific routing, automated status updates and other features help reduce distraction and let your drivers focus on the road.

Enhance driver well-being

Make life easy for your drivers with tools that optimize their day. Simplify in-cab experience with a single, flexible mobile app that can be used across Android-powered devices.

KEY FEATURES

- ✓ **Safe truck specific navigation** – Provide drivers with hands-free, easy-to-use navigation that includes routes optimized for truck type, height, weight, length and more.
- ✓ **ELD** – Ensure easy, accurate and consistent regulatory compliance. Approved, registered and fully compliant with FMCSA in the United States and CCMTA in Canada.
- ✓ **DVIR** – Stay on top of defects and keep your trucks operating smoothly with a full compliant, integrated and configurable digital DVIR.
- ✓ **Weight mileage, fuel tax and road user assessment fee reporting** – Digitize IRP, IFTA Easy File, and Electronic Oregon WMT & RUAF capture and reporting.
- ✓ **Messaging** – Two-way messaging between the cloud-based platform and driver.
- ✓ **Job workflow** – Easily send routes, lists or sequences of jobs to drivers so they can best utilize their time on the road. Streamline your tech stack and increase efficiency by integrating with your Transportation Management System (TMS).
- ✓ **Custom driver forms** – Eliminate paper forms and use fully customizable digital checklists to save time and make your drivers' day-to-day easier, including hazardous materials checks, PPE checks, incident reports and more. Use text, images, video, signature capture, check boxes, and more.
- ✓ **Supports 3rd party apps** – Centralize all mobile apps in one place for your drivers to help make their experience more intuitive. Drive supports the ability to add any Android-based app.
- ✓ **Works while out-of-coverage** – Maintain connection in low coverage areas as you seamlessly switch networks thanks to dual SIM card capability. For remote locations with no network available, Drive will store your data and automatically upload it when connectivity returns.
