

EROAD

EROAD Nav

Navigate with confidence

Prioritize driver well-being and productivity with tailored truck-specific navigation, real-time traffic updates, and seamless job integration.

Our dynamic app ensures your drivers stay focused on the road, enhancing fleet safety and productivity.

Boost Driver Productivity

Allow drivers to act in real-time, streamline workflows, and facilitate stronger communication from the vehicle to the back-office.

Enhance Driver Well Being

Easy to use, intuitive interface with live navigation, voice guidance, and integration into existing apps to keep your drivers focused on the road.

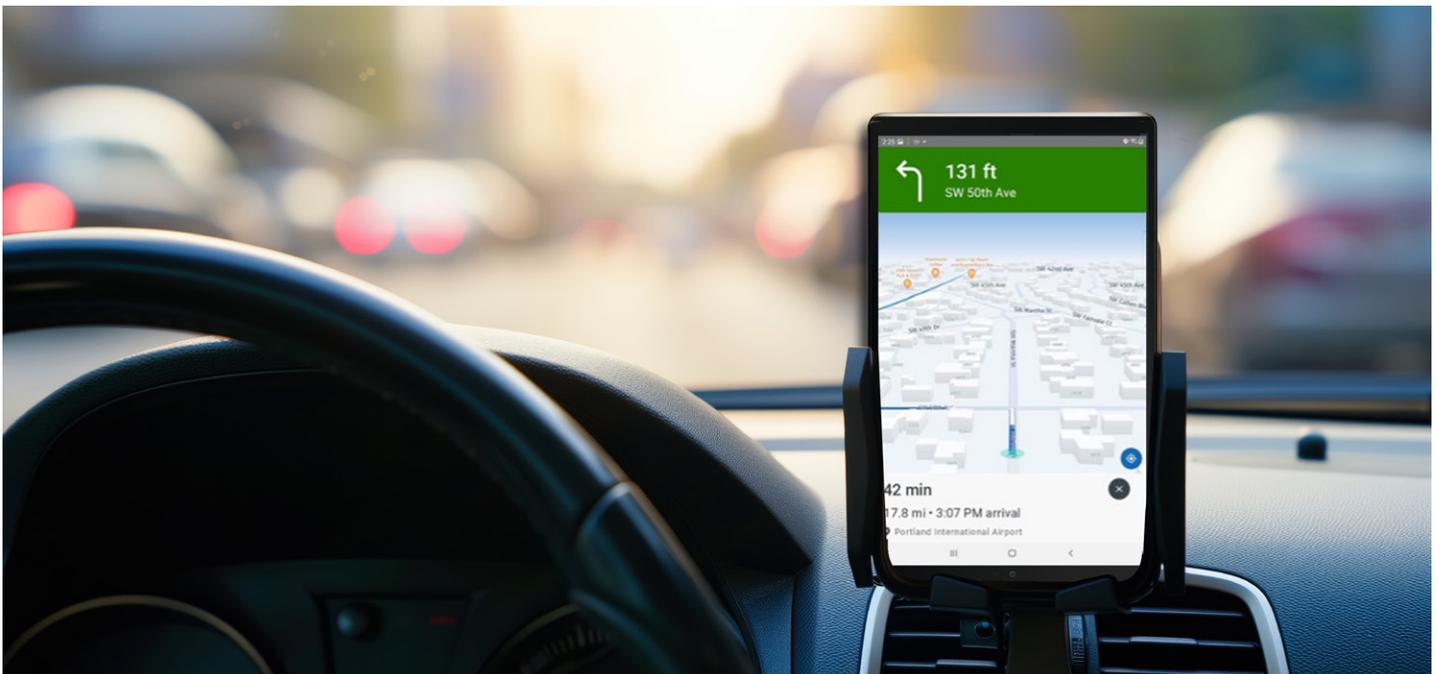

Improve Driver Safety

Keep drivers informed of traffic conditions and routes ahead of time and provide voice guidance, reducing distractions with in-cab technology.

KEY FEATURES

- ✓ **Truck specific navigation** – Optimize routes based on each vehicle, improving safety, compliance, time, and efficiency.
- ✓ **Easily integrate with job workflows** – Enhance productivity by assigning jobs to drivers within the same application they use to navigate.
- ✓ **Fast over-the-air updates** – Updates are delivered seamlessly over-the-air, focusing solely on the new changes added. This minimizes inconvenience, data costs and ensures a smooth driving experience.
- ✓ **Live traffic routing** – Dynamically adjust routes upon generation based on live traffic information such as congestion, accidents, and road closures, and more saving time and frustration.
- ✓ **Offline mapping support** – Drivers can rely on the navigation, even when out of service, for greater flexibility, reliability and control.
- ✓ **Turn-by-turn voice guidance** – Provide convenient hands-free voice navigation to keep your drivers focused on the road.
